Residential Valuation Fees

IPAV continues to advocate strongly on behalf of Residential Valuers regarding fee increases. We are acutely aware that fees from several financial institutions have remained unchanged for many years, and this remains a key priority for us.

Our CEO met with AIB in September to progress this matter and is scheduled to meet with them again early in the new year. We will continue to engage with all relevant institutions to secure fair and sustainable fee structures for our members.

As soon as there is any further development, we will update valuers immediately.

RTB Annual Conference 2025

The RTB's Annual Conference, "Delivering a Sustainable Rental Sector!" took place on Thursday 27th November in the beautiful Royal Irish Academy of Music.

As part of the Conference the RTB launched their quarterly update. IPAV's CEO took part in a panel discussion on the changing profile of Ireland's rental sector with three other stakeholders

Accelerating Infrastructure Report and Action Plan

The Accelerating Infrastructure Report and Action Plan sets out the Irish Government's programme to speed up delivery of key electricity, water, and transport projects. Despite record levels of capital investment, progress is slowed by structural barriers including legal challenges, regulatory complexity, fragmented governance, and low public acceptance.

The State plans to invest €275 billion by 2035 to meet the needs of a rapidly growing population. The report identifies 12 major delivery barriers — such as rising judicial reviews, slow and inconsistent planning, construction capacity limits, and weak coordination between agencies.

To overcome these, the plan introduces four reform pillars containing 30 actions with timelines (mostly to 2026), success measures, and assigned responsibilities, forming a system-wide blueprint for accelerating infrastructure delivery.

CEPI - EU Commissioner Dan Jørgensen receives new recommendations to address housing crisis

The EU's Housing Advisory Board is urging a major shift in how Europe approaches housing—defining affordability through long-term costs and quality, prioritising “housing first,” reusing existing buildings before constructing new ones, and streamlining planning without lowering standards. It also calls for expanding cost-rental models, boosting modular construction, improving rural–urban balance through investment, and creating better coordinated EU-wide housing data. These recommendations feed into growing political momentum, echoed by MEP Irene Tinagli, for stronger EU action and long-term investment to address the housing crisis.
